Selection of bodies implementing FIs

Selection criteria
Art. 7(1)(a) to (f); 7(2) first par. CDR

- Legal capacity
- Economic and financial capacity
- Organizational capacity
- Experience

Awarding criteria
Art. 7(2)(a) to (f) CDR

- Investment methodology
- Ability to raise additional resources
- Additionality of investment activity
- Level of management costs and fees

EC guidelines
*Guidance for MS on the selection of bodies implementing FIs*
A Funding Agreement (FA) is required when:

- The MA makes a contribution into a Financial Intermediary, which will implement the FI;
- The MA entrusts the implementation of a FI to a FoF, whether EIB Group, an IFI or a national body.

Despite being under the same name, the two agreements are very different:

- The latter needs to include the elements listed under Annex IV of CPR;
- The former needs to include also all elements of the FI deployed, i.e. the commercial terms of the loan, the guarantee, the equity investment deployed in accordance with market and industry standards. We can define it as “Operational Agreement” – although this is also a FA under the CPR.
Tips & tricks - selection of F.Int. and drafting of the FA

• Alignment of interest between MA and FoF/F.Int. (e.g. by performance-based remuneration)

• Flexibility needed. FA need to leave room for adapting the FI to changed conditions

• Be sure that whoever is implementing the FI has sufficient skills in ESIF rules and that the FA includes the following:
  • Treasury (interests can be used to cover management fees!)
  • Clear, easy-to-implement Monitoring & Reporting procedures to be set out
  • Audit – MA can request the F.Int. to perform sample checks on FIs final recipients. AA consultation recommended
Reporting process - example

**Qualitative part:**
- Progress and analysis of implementation
- Information on promotion activity
- Information on implementation problems & remedial actions
- …

**Treasury information**

**Expenditure:**
- Information on financial progress at:
  - FoF
  - FI level and
  - Project level

**Implementation Indicators**

**Monitoring activity report**

Progress report (quarterly)
Some lessons learned: market test

Market test to test, inter alia:

• Likelihood of the product to be accepted/ absorbed by potential financial intermediaries

• Confirm that the financial instrument responds to the final beneficiary’s needs (as a result of this adaptation to certain features of the type of financial instruments may be done)

At design level market test is needed to avoid competing with other actions (both subsidies and financing options) so to ensure complementarity in a target geography

# FIs for social entrepreneurship – what could go wrong?

<table>
<thead>
<tr>
<th>Recurring pitfalls</th>
<th>Remedies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Burdensome procedures, high rate of rejected applications</td>
<td>Keep it smart and simple! FIs should be leaner and more user friendly than grants! TA at a project preparation level Quick appraisal and disbursement – if it takes too long, the final recipient might be gone or no more interested!</td>
</tr>
<tr>
<td>Low take-up level (no appetite for F.Int. and/or final recipients)</td>
<td>Flexibility to adapt the FI to changed market conditions. MA to lead the strategy – F.Int. to implement. Communication and awareness campaigns needed Create a conducive environment – some TA actions aiming to strengthen the</td>
</tr>
</tbody>
</table>
Lessons learned – selection of final recipients

Assessment of the creditworthiness of ESF final recipient typically involves the project soundness and financial viability rather than the final recipient himself (they normally have no credit history – no collateral)

So, selection criteria should focus on project’s financials and its ability to pay back the loan (typically evidenced by the business plan, cash flow projection, etc.), regardless final recipient’s collateral

But... it’s not always easy for the F.Int. (unless they’re specialised in that segment, they normally check traditional creditworthiness parameters) and it takes a long time!

**Tip:** don’t add unnecessary eligibility requirements for final recipients!
- Fine to set “preferential lanes” for particular target groups, but strict exclusion criteria (tightening too much the final recipient cohort) could hinder the deployment of the FI
- FIs’ and grant’s eligible expenditures are the same

#ficompass
Thresholds of Article 13(1) and (2) CDR were designed to reward quick disbursements towards final recipients. The "general-cap rate" - thresholds of Article 13(3) CDR were introduced to mitigate the risk that quick disbursement becomes the main/only incentive the part exceeding the ceilings will be treated as ineligible under the ESIF!
Management costs and fees - example from the ground (Poland)

BGK – Fund of funds management costs:
• Will be set on the basis of actual expenses incurred
• Need to meet the milestones
• Thresholds for BGK in the implementation of loans:
  ❑ 1st year: 3% of the contribution paid from the OP + 0.5% of the contribution paid to F.Int.
  ❑ 2nd year: 1% of the contribution paid from the OP + 0.5% of the contribution paid to F.Int.
  ❑ 3rd year and over: 0.5% of the contribution paid from the OP + 0.5% of the contribution paid to F.Int.
  ❑ Max 7% of the contribution paid from the OP during the eligibility period
• Limits for BGK in the implementation of counter-guarantees:
  ❑ For all years: 0.5% of the contribution paid from the OP + 1.5% of the contribution paid from the OP involved under outstanding guarantee agreements
  ❑ Max 10% of the contribution paid from the OP during the eligibility period
Management costs and fees - example from the ground (Poland) (2)

Management costs of Financial Intermediaries:

• On the levels from the offers from Financial Intermediaries in the public procurement selection process

• Up to 14-20%, depending on the macroregion

• Related to performance in lending activity – paid out in two tranches:
  - 70% of the entitled amount on disbursement of a loan
  - 30% of the entitled amount on the basis of repayment of a loan
**Equity FIs Co-investment facility**

Based on ANNEX V – Implementing Regulation (EU) No 964/2014

- **ESIF**
  - Private independent fund manager
    - At least 1% contribution
    - Selection
      - Co-investor (2)
      - Co-investor (3)
      - Co-investor (4)
      - Co-investor (5)

- **SMEs**
  - Typically seed, start-up or expansion phase
  - Max amount per deal < EUR 15 m

Co-investors (typically VC funds, business angels, family offices, High Net Worth (HNW) individuals, companies)
**Micro-loan components**

a. "Guarantee": max 10% of the total financial endowment awarded to the FI, covering the "Amortizing" Component.

b. "Bullet": a 5 year loan at zero interest rate, repayable in a unique final solution. Not repayable under certain conditions.

c. "Amortizing": a 5 year loan, at fixed interest rate, repayable and amortized on monthly basis, provided by the FIs with their own resources.

**Equity**

Max 50 members per Cooperative to be funded
Max 200,000€ per Cooperative (de minimis rules)

---

**Activities & Remuneration**

- GAP ANALYSIS of the market
- DESIGN of JEREMIE ESF LOMBARDIA
- INVESTMENT STRATEGY
- MANAGEMENT OF THE FUND: from an administrative and accounting point of view (as a separate block of finance)
- SELECTION OF FIs: (Publication the call on EC OJ and signature of the contracts)
- MONITOR AND REPORT PERIODICALLY TO MA
- CARRY OUT COMMUNICATION activities

- FINLOMBARDA SpA remuneration: ALMOST EQUAL TO THE ACCRUED INTERESTS. Managing Authority reimburses the sustained and certified costs by Finlombarda through the Fund.
- FINANCIAL INTERMEDIARIES: «ZERO FEE» (no remuneration from JEREMIE FSE LOMBARDIA). Fixed interest rate applied on the "Amortizing" component of the loan.
Student loans – tips from on-the ground experience

- Who does the assessment of the financial needs of the student? MA or F.Int.?
- Terms of financial product for students shall take into consideration
  - Future capacity to repay the loan (by assessing the presumable future revenue, which will depend on the career path, localization, etc.)
  - Costs to be incurred by the recipient along his study career, including tuition fees, cost of life, transportation, etc. (national exchange or mobility programmes/ Erasmus+ as a reference?)
  - Need for a grace period
- Is there any F. Int. dealing with this topic in your Country and whose selection procedures you can rely on?
- Tranched disbursement to final recipient and continuous monitoring

Note: TBD = To Be Determined, QF = Quota for Spanish students.
Communication and dissemination

• FIs with a broad target spectrum vs FIs addressing particular target

• The latter may require ad-hoc awareness raising campaign to reach out to final recipients (roadshows, mailings, advertising, etc.), even more if the F.Int. doesn’t have a local presence/branches

• MA and F.Int. could benefit from synergies with local PAs and other stakeholders
