Czech Republic

Robert Pernetta, *fi-compass* team

Session 5

**Financial instruments supporting infrastructure
PPP, intermodal transport terminals, electric
vehicle charging and green transport**

Discussion session 5

Financial instruments supporting transport / infrastructure

Discussion session results:

1. Ensure political support

- An argument could be that a general shift from grants to FIs is unavoidable, there will be less money for grants in the future

2. Create FIs complimentary to grants

- There will be always place for grants, however there are areas in transport (generating net revenue) where FIs make sense
- Putting the focus on creating business cases in the transport / infrastructure sector through financial and non-financial incentives
