Capital rebate	Capital rebate	Capital rebate	Capital rebate
15%	25%	35%	50%
min 30% energy saving and min 50.000 kWh	min 40% energy saving and min 100.000 kWh	min 50% energy saving and min 200.000 kW	min 67% energy saving and min 400.000 kWh and at least one measure/activity in RER

Loan FI combined with a capital rebate-process

 The Final recipients submit a single financing application to the financial intermediary. Financial intermediaries check the investments' eligibility and assess the financial viability of the project, sign a contract with final recipient and provide a loan covering the entire value of the investment. The amount and/or the percentage and conditions that trigger the capital rebates should be clearly set out in the loan agreement signed with the final recipient. Following ex-post verification, the capital rebate clause in the loan contract is triggered and a part of the loan is converted into a grant. Capital rebate is treated as a write-off/an early repayment; no early redemption fees for parts of the loan that benefit from the rebate. The final recipient benefits from a reduction of the loan and will repay the loan outstanding following a revised repayment plan.
